

CRANE OPERATOR

E: joe.bloggs@hotmail.com

With a solid foundation as a Crane Operator, adept at handling various cranes including 275 T Sumitomo and 200 T Liebherr Crawler models, I bring extensive experience in operating heavy equipment with precision and safety in mind. Proficient in conducting thorough pre-operational checks, manoeuvring cranes to lift and position heavy loads, and adhering to strict safety protocols, I have consistently demonstrated a commitment to excellence in every task. My collaborative nature fosters effective communication with team members to ensure seamless operations, while my dedication to ongoing learning keeps me abreast of industry best practices. Seeking to leverage my skills and expertise in a dynamic work environment where safety and efficiency are paramount.

- Construction Safety Awareness Training (Blue Card), WA Government
- Open Ticket Crane Operator, WorkSafe
- TBOSIET - Tropical Basic Offshore Safety Induction and Emergency Training (OPITO approved)
- WA Class HC R & F Extended Driver's License (No. 3278870), Department of Transport
- Working Safety at Height Course - RIIWHS204D, Skills Training & Engineering Services
- License to Perform High-Risk Work (No. WL 1068306), WorkSafe

- National Police Clearance
- CO: Slewing Mobile Crane
- CN: Non-Slewing Mobile Crane
- CV: Vehicle Loading Crane
- DG: Dogging
- LF: Fork-lift Truck
- RA: Advanced Rigging
- SA: Advanced Scaffolding
- WP: Boom-type Elevating Work Platforms

- DeMag: 300 - 350 Tonne DeMag Crawler
- Franna: 20 & 25 Tonne Franna
- Kato: 50 Tonne Kato
- Leibherr Todano: 70 & 80 Tonne

- Sany: 300 Tonne Sany Crawler
- Sumitomo: 275 Tonne Sumitomo, 250 Tonne Sumitomo Crawler Leibherr: 200 Tonne
- Tadano; 70, 80 & 100 Tonne Tadano Rough Terrain

PLUTO LNG PROJECT: KARRATHA, WA

NOV 2024 – PRESENT

CRANE OPERATOR

Responsibilities:

- Operated 100-ton Tadano rough terrain and Franna to lift and position heavy materials, equipment, and structures in accordance with project plans and safety regulations.
- Conducted pre-start inspections and routine maintenance checks to ensure crane safety and operational readiness.
- Collaborated closely with riggers, dogmen, and site supervisors to execute precise lifts in high-risk LNG construction environments.
- Interpreted lift plans, load charts, and site instructions to perform lifts efficiently and safely.

- Ensured strict compliance with Bechtel's safety procedures, permit systems, and environmental standards.
- Assisted in the setup and dismantling of cranes and lifting gear as required by the evolving site layout.
- Participated in toolbox talks, safety briefings, and risk assessments to promote a safe work culture.
- Maintained accurate records of crane operations, maintenance activities, and incident reports.
- Adapted to dynamic site conditions and adjusted lift strategies in response to weather, terrain, and logistical constraints.
- Supported other construction activities during crane downtime, contributing to overall project progress.

PERTH, WA
JAN 2024 – OCT 2024
CRANE OPERATOR
Responsibilities:

- Safely operated a 150 T Grove crane.
- Conducted pre-operational inspections.
- Manoeuvred crane to lift and position heavy loads.
- Adhered to all safety protocols and regulations.
- Communicated effectively with team members.
- Maintained accurate records of daily activities and equipment maintenance.
- Troubleshoot and resolve minor operational issues.
- Monitored weather conditions and adjust operations.
- Collaborated with site supervisors to plan and execute lifts.
- Continuously monitored equipment performance and reported abnormalities.
- Participated in ongoing training and certification programs.
- Ensured compliance with company policies and procedures.

VARIOUS SITES: WA
MAY 2023 – DEC 2023
CRANE OPERATOR
Responsibilities:

- Safely operated 25 T Franna crane
- Conducted pre-operational inspections.
- Manoeuvred crane to lift and position heavy loads.
- Adhered to all safety protocols and regulations.
- Communicated effectively with team members.
- Maintained accurate records of daily activities and equipment maintenance.
- Troubleshoot and resolve minor operational issues.
- Monitored weather conditions and adjust operations.
- Collaborated with site supervisors to plan and execute lifts.
- Continuously monitored equipment performance and reported abnormalities.
- Participated in ongoing training and certification programs.
- Ensured compliance with company policies and procedures.

KWINANA, WA

AUG 2022 – MAY 2023
CRANE OPERATOR
Responsibilities

- Operated 275 T Sumitomo Crane and 200 T Liebherr Crawler crane efficiently.
- Conducted pre-operational inspections.
- Manoeuvred crane to lift and position heavy loads.
- Adhered to all safety protocols and regulations.
- Communicated effectively with team members.
- Maintained accurate records of daily activities and equipment maintenance.
- Troubleshoot and resolve minor operational issues.
- Monitored weather conditions and adjust operations.
- Collaborated with site supervisors to plan and execute lifts.
- Continuously monitored equipment performance and reported abnormalities.
- Participated in ongoing training and certification programs.

ROY HILL PROJECT: WA

MAY 2021 – AUG 2022
CRANE OPERATOR
Responsibilities

- Operated 275 T Sumitomo Crane proficiently and safely in accordance with operational guidelines.
- Conducted pre-operational inspections.
- Maneuvered crane to lift and position heavy loads.
- Adhered to all safety protocols and regulations.
- Communicated effectively with team members.
- Maintained accurate records of daily activities and equipment maintenance.
- Troubleshoot and resolved minor operational issues.
- Operated 200 T Liebherr Crawler crane with precision
- Monitored weather conditions and adjusted operations accordingly to ensure safety.
- Collaborated with site supervisors to plan and execute lifts effectively.
- Continuously monitored equipment performance and reported any abnormalities.
- Participated in ongoing training and certification programs to enhance skills and knowledge.

WUMMANA PROJECT: WA
NOV 2020 – MAR 2021
CRANE OPERATOR
Responsibilities

- Operated 200 T Crawler crane efficiently and safely in adherence to operational procedures.
- Conducted pre-operational checks to ensure crane functionality and safety standards.
- Positioned and maneuvered the crane to lift and place heavy loads accurately.
- Maintained strict compliance with safety regulations and protocols during all crane operations.
- Collaborated closely with team members to coordinate lifts effectively and safely.
- Kept meticulous records of daily activities, including equipment maintenance and usage.
- Addressed and resolved any minor operational issues encountered during crane operations.
- Monitored and adjusted crane operations in response to changing weather conditions.

CRANE OPERATOR

Responsibilities

- Operated a 40 T Crawler crane proficiently and safely, adhering to operational guidelines and safety protocols.
- Conducted thorough pre-operational inspections
- Positioned and maneuvered the crane to lift
- Maintained a keen awareness of surroundings and followed all safety regulations during crane operations.
- Communicated effectively with team members to coordinate lifts and ensure seamless workflow.
- Recorded detailed logs of daily activities, including equipment maintenance and operational tasks.
- Identified and resolved minor operational issues promptly.
- Adapted crane operations to accommodate changing environmental conditions, as necessary.
- Collaborated closely with supervisors to plan and execute lifts according to project requirements and timelines.
- Monitored equipment performance closely and reported any abnormalities or concerns to relevant personnel.
- Engaged in continuous professional development through training programs to enhance skills and knowledge.
- Upheld strict adherence to company policies and procedures

KEMERTON LITHIUM HYDROXIDE PLANT: WA

MAR 2020 – AUG 2020

CRANE OPERATOR

Responsibilities

- Operated a 200 T Crawler crane proficiently and safely, adhering to operational guidelines and safety standards.
- Conducted thorough pre-operational inspections to verify the crane's functionality and readiness.
- Positioned and maneuvered the crane to lift
- Maintained strict compliance with safety regulations and protocols throughout all crane operations.
- Collaborated closely with team members to coordinate lifts effectively and ensure smooth workflow.
- Recorded detailed logs of daily activities, including equipment maintenance and operational tasks.
- Addressed and resolved any minor operational issues
- Adapted crane operations to accommodate changing environmental conditions as required.
- Collaborated closely with supervisors to plan and execute lifts
- Monitored equipment performance closely
- Engaged in continuous professional development through relevant training programs to enhance skills and knowledge
